Profile Summary

I am a Software Engineer - Frontend, a programming enthusiast with 2 years of working experience in Frontend development, and an open-source contributor eager to contribute to team success through hard work, reliability, innovative ideas, and excellent organizational skills.

Education

Nnamdi Azikiwe University Awka, Anambra State Nigeria.

Bachelor of Science, Anatomy

11/2016 - 05/2021

ALX Holberton School of Software Engineering

Full Stack Software Engineering

07/2022 - 10/2023

Course Work

- Low-level programming & Algorithm
- Higher-level programming
- System engineering & DevOps
- Technical Writing and Networking
- Frontend Development (React, NextJs)

ZuriXl4g Software Development Training

Frontend Development

09/2022 - 03/2023

Course Work

- JavaScript
- CSS
- HTML
- Git and Github

Internship Experience

Frontend Developer Intern

HNGx

07/2023 - 10/2023

- Wrote clean, efficient, and maintainable code that not only met immediate project requirements but also laid the foundation for scalable and adaptable software.
- Worked with React, Typescript, NextJS, and TailwindCSS to implement pixel-perfect and dynamic web websites/applications.
- Implement and worked with APIs in NextJS which increased the code quality
- Implemented responsive and pixel-perfect web designs
- Worked closely with cross-functional teams, including product managers, designers, quality assurance, backend developers, and fellow frontend developers, to ensure a holistic and successful software development process.
- Stayed up-to-date with the latest technologies and trends, incorporating them into projects to enhance performance, security, and user experience.

Software Engineering Intern - Frontend

ALX - Africa

07/2022 - 10/2023

- Leveraged my creative problem-solving skills to design and develop software solutions that addressed specific needs and challenges.
- Worked closely with cross-functional teams, including product managers, designers, and quality assurance, to ensure a holistic and successful software development process

- Engaged in full-stack development, seamlessly navigating between front-end and back-end technologies to create cohesive and user-friendly applications.
- Stayed up-to-date with the latest technologies and trends, incorporating them into projects to enhance performance, security, and user experience.
- Conducted and participated in regular code reviews, providing constructive feedback to team members to maintain code quality and consistency.

Skills

- React, Vite, NextJS, Typescript, TailwindCSS, UnoCSS
- JavaScript, SASS, CSS, HTML, Bootstrap
- Firebase, API, Postman, Npm, Yarn
- Git, Github, Figma, Canva
- Python

Professional Work Experience

Upwork

Freelancer (Frontend Developer)

2023 till date

- Specialize in building highly interactive web applications that captivate users using React, NextJS, Typescript and TailwindCSS. I create dynamic user interfaces with fluid transitions and animations that enhance user engagement
- Collaborate with cross-functional teams including designers, product managers and backend developer to create high-quality products
- Stay up-to-date with the latest web development trends and technologies, ensuring that my clients receive the most current and innovative solutions
- Participate in code reviews and providing constructive feedback to other developers.

Personal Projects

Music Box

[Live Link](#)

- A dynamic movie discovery web application that allows users to search for movies, view details about them, and save their favorite movies.
- Built with React, Vite, UnoCSS and API

Get-Linked

[Live Link](#)

- A technology innovation Hackathon established by a group of organizations with the aim of showcasing young and talented individuals in the field of technology
- Built with React, Vite, Typescript and TailwindCSS

Portfolio

[Live Link](#)

- My portfolio website that showcases more about me, the services I provide, and a range of projects that highlight my skills in different programming languages and tools. From creating responsive and pixel-perfect web designs to incorporating engaging web animations.
- My portfolio showcases my ability to build dynamic websites that cater to both clients and users.
- Built with NextJS, Typescript and TailwindCSS

Gallery-Box

[Live Link](#)

- A dynamic drag and drop image gallery using react that enables a user to sign-up, login and reorder images by dragging and dropping them.
- Built with React, Vite, Firebase, React-DnD and React Styled-Components

Credit-Café

[Live Link](#)

- A dynamic credit card generator website that create downloadable dummy credit card samples with card numbers, CVV, and card name on it.
- Built with JavaScript, CSS, HTML, Local Storage, Session Storage
